

Videomenthe's secured and accelerated collaborative media file transfer platform

login/password authentication

Transfer acceleration

Data security

File delivery reliability

Supervised hosting in France

Choice of files storage, backup or purge

Visibility for the administrator

Notifications of content delivery

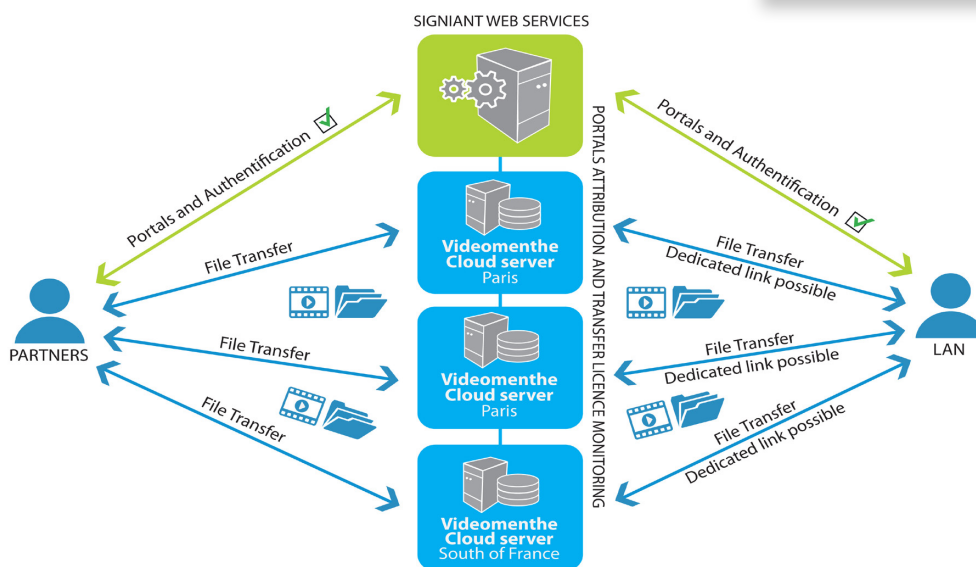

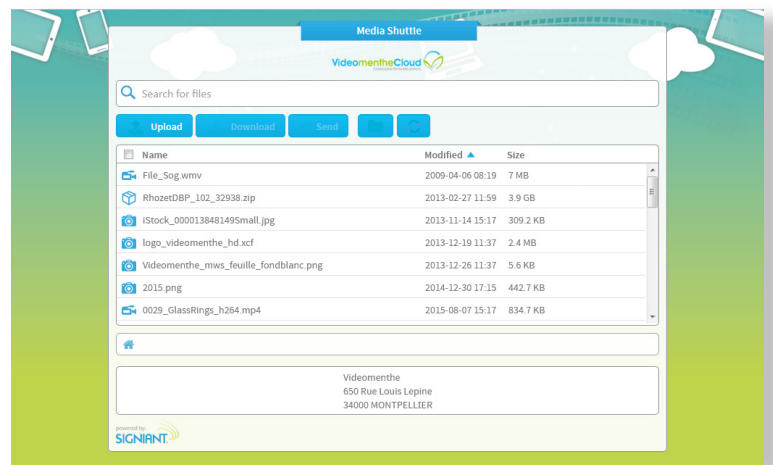

Simple and intuitive user interface

Customizable portal

VideomentheCloud provides customized portals which are accessible via login/password for sending content over IP, or making content available on a dedicated storage in the VideomentheCloud hosted in France.

Files can be uploaded/downloaded by either authorized administrators or users, and either stored or erased after transfer, depending your needs. This service is based on the SaaS Media Shuttle™ from SIGNANT, being hosted on the Videomenthe servers in our premises.

Secure and accelerate your media files exchange with VideomentheCloud
